NSW Ministry of Health

Data Dictionary
NSW Admitted Patient (Public Sector) Data
September 2025

The NSW Admitted Patient (Public Sector) Data includes details of the services provided to patients who are formally admitted to NSW public hospitals and multi-purpose services.

Overview

The NSW Admitted Patient (Public Sector) Data includes details of the services provided to patients who are formally admitted to NSW public hospitals, multi-purpose services and in-scope contracted private hospitals.

Details about the admitted patient service events are recorded in patient administration systems. The details captured include:

- patient characteristics (demographics)
- service event administrative details (such as bed/ward movements, election status and financial arrangements, leave, legal status, transfers and referrals) and
- professionally coded clinical information pertaining to interventions the patient received, diagnoses, external cause, activity when injured, place of occurrence and morphology associated with primary sites of cancer.

Scope and coverage

The following health organisations must report all admitted patient service events they provide to the collection:

— NSW Health public hospitals (general and psychiatric)

— NSW Health public multi-purpose services (MPS)

— In-scope contracted private hospitals

Data supply requirements and content specifications for NSW Admitted Patient (Public Sector) Data have varied over time.

Clinical coding: Diagnosis and interventions / procedures

- Diagnosis information is classified according to the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification (ICD-10-AM)
- Procedures and interventions are classified according to the Australian Classification of Health Interventions (ACHI).
- The Australian Coding Standards (ACS) specifies coding standards that provide guidelines to assist users of the classifications in obtaining consistency in clinical coding nationally. Public and private hospitals in Australia use ICD-10-AM/ACHI/ACS to classify episodes of admitted patient care. These classifications are usually updated every two years to ensure they are fit for purpose and remain clinically current.
- Descriptions of the ICD-10-AM/ACHI/ACS codes are not provided in this document, or in the NSW Admitted Patient (Public Sector) Data. You can access descriptions from Independent Health and Aged Care Pricing Authority.

Changes to NSW admissions policy

From 15 June 2017, emergency department (ED)-only episodes of care were no longer included in admitted patient data. Consideration should be given to excluding ED-only episodes of care from analyses to ensure consistency with historical data. See the HealthStats NSW Statistical methods paper for more detail.

Access to information on Aboriginal and Torres Strait Islander peoples

An application to the Aboriginal Health and Medical Research Council (AH&MRC) ethics committee should be made for research projects for which one or more of the following apply:

- The experience of Aboriginal people is an explicit focus of all or part of the research
- Data collection is explicitly directed at Aboriginal peoples
- Aboriginal peoples, as a group, are to be examined in the results
- The information has an impact on one or more Aboriginal communities
- Aboriginal health funds are a source of funding

Research that is not specifically directed at Aboriginal people or communities, such as for the total population or a sub-population (e.g., rural NSW, people over 50 years old) can still potentially impact on Aboriginal people.

However, an application for such research need only be made to the Committee if any one of the following applies:

- Any of the five factors listed above are present: or
- Aboriginal people are known, or are likely, to be significantly over-represented in the group being studied (e.g., compared to the proportion of Aboriginal people in the NSW population for the study period); or
- The Aboriginal experience of the medical condition being studied is known, or is likely, to be different from the overall population; or
- There are Aboriginal people who use the services being studied in distinctive ways, or who have distinctive barriers that limit their access to the services; or
- It is proposed to separately identify data relating to Aboriginal people in the results.

The AH&MRC ethics committee have some specific requirements, including evidence of community engagement in the research. Relevant documents can be found on the AH&MRC website at: http://www.ahmrc.org.au. If you are unsure whether an application to the AH&MRC Ethics Committee is required, please seek the advice of the AH&MRC Ethics Committee secretariat.

Admitted Patient (Public Sector) Data

EDWARD Format

On 1 July 2023 NSW Health launched a new centralised data warehouse known as EDWARD: a contemporary system to ensure our information is high quality, integrated, accessible and utilised.

For record linkage projects:

- NSW Admitted Patient (Public Sector) Data is available in EDWARD format for service events from 1 July 2023 onwards.

- Northern Beaches Hospital Admitted Patient Data for public patients is available in EDWARD format from 30 October 2018.

- Albury Base Hospital Admitted Patient Data is not available after 7 November 2024

Data structure

For record linkage projects, EDWARD format data is available in the following structures:

- Service event information and client characteristics

- Service event Diagnosis information.

- Service event Intervention information.

The Service Event Combined Business Key Surrogate Key should be used to join Diagnosis and Intervention information to the Service event and client characteristics.

In EDWARD, the full client characteristics and history are reported by a dedicated data stream for all NSW Health clients – the Client Characteristics Data Stream.

For Admitted Patient service events, unless otherwise specified, client characteristics represent the client details at the end of the service event.

See Admitted Patient (Public Sector) Data EDWARD Format variable list for variable list.

Organisation Service Provider Information for service events is recorded and made available for linkage projects as a 7 Digit Identifier based on the relevant entry in the NSW Health Establishment Registration Online (HERO) application (PD2024_042).

For Admitted Patient Data, a service event is equivalent to an episode of care in the legacy / historical data

Legacy / Historical data availability

Admitted Patient (Public Sector) Data is available for record linkage projects for the period 1 July 2001 – 30 June 2023 in a legacy format.

Data structure

Admitted Patient (Public Sector) Data is available in the following structures

- Episode information and client characteristics

- Episode Diagnosis information.

- Episode Intervention information.

- Episode Australian Diagnosis and Related Group information (AR-DRG)

Facilities are recorded in the legacy Admitted Patient (Public Sector) Data using a 4-Digit HIE facility identifier.

See Admitted Patient (Public Sector) Data Legacy Format variable list for variable list.

Data Custodian

Executive Director, System Information and Analytics, NSW Ministry of Health.

The CHeReL organises data custodian sign-off for NSW Admitted Patient (Public Sector) Data on behalf of the researcher. To arrange sign-off, please contact:

Variable lists

Admitted Patient (Public Sector) Data EDWARD Format variable list

Variable list: EDWARD Service event and client characteristics.

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Service Event Combined Business Key Surrogate Key (Masked)	Service Event Combined Business Key Surrogate Key.	SE_CBK_SK	
Service Encounter Record Identifier (Masked)	A source system assigned unique identifier for a record representing a client / patient's continuous contact with a health organisation. One encounter may have one or many service events, each of a different or same service event type.	SRV_ENC_REC_ID	
Service Event Record Identifier (Masked)	The unique identifier assigned by the source system to the service event record.	SE_REC_ID	
Source System Code	The NSW State unique identifier assigned to an instance of a source system that supplies data to the NSW Health enterprise data warehouse.	SRC_SYSTEM_CD	Domain values: Service Event Source Identifier - Admitted Patient & Residential Care Services (EDW)
Service Event Type Code	An indication of whether the service event is for a community health / outpatient care services, an admitted patient service, a residential aged care service, or an emergency department service.	SE_TYP_CD	Domain values: Service Event Type Code (EDW)
Service Event Start Datetime	The date and time the patient is formally admitted to hospital as an admitted patient, or the date and time the patient is type changed to a different service category during their stay in hospital.	SE_ST_DTTM	
Service Event End Datetime	The date and time the patient is formally discharged from the hospital, or the date and time the patient is type changed to a different service category during their stay in hospital.	SE_END_DTTM	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Last Responsible Organisation Service Provider OSP ID	The unique value identifying the Organisation Service Provider reported as the responsible service provider for the service event.	LST_OSP_ID	
Last Responsible Organisation Service Provider - Health Organisation OSP ID	The unique value identifying the Organisation Service Provider - Health Organisation reported as the responsible service provider for the service event.	LST_HLTH_ORG_OSP_ID	
Last Responsible OSP - Management Authority Identifier	The identifier for the legally constituted health authority (Local Health District or Network) that has overall responsibility for Organisational Service Provider reported as the responsible service provider for the service event	MG_AUTH_ID	
Last Responsible OSP - Facility Peer Group Code	Groupings of public health facilities that are considered similar for benchmarking purposes.	PEER_GRP_CD	Domain values: Facility Peer Group Masterlist (EDW)
Last Responsible Organisation Service Provider - Acute Hospital Flag	An indicator to denote whether the organisation service provider is classified as an acute hospital.	LST_HLTH_ORG_ACUTE_HOSP_FG	Domain values: Acute Hospital Flag (EDW)
Admitted Patient Service Event Sequence Number within Encounter	The sequence of service events associated with the same service encounter for the same source system identifier where the service event type is either admitted patient or residential care.	SEQ_AP_SE_IN_ENC	
Related Service Event - Admitted Patient to ED (Masked)	Related ED Service Event CBK Surrogate Key (Reported by source system).	RLTD_SE_AP_TO_ED_SE_CBK_SK	
Created by Organisation Service Provider Health Organisation OSP ID	The unique value identifying the Organisation Service Provider - Health Organisation that created the service event record	CREATED_BY_HLTH_ORG_OSP_ID	
Created by Organisation Service Provider Management Authority OSP ID	The identifier for the legally constituted health authority (Local Health District or Network) that has overall responsibility for Organisational Service Provider that created the record.	CREATED_BY_MG_AUTH_ID	
Inbound Transfer Organisation Service Provider - Health Organisation OSP ID	Inbound Transfer Organisation Service Provider Health Organisation OSP ID.	IB_TSF_OSP_HLTH_ORG_OSP_ID	
Inbound Transfer Organisation Service Provider OSP ID	Inbound Transfer Organisation Service Provider OSP ID.	IB_TSF_OSP_ID	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Outbound Transfer Organisation Service Provider Health Organisation OSP ID	Outbound Transfer Organisation Service Provider Health Organisation OSP ID.	OB_TSF_OSP_HLTH_ORG_OSP_ID	
Outbound Transfer Organisation Service Provider OSP ID	Outbound Transfer Organisation Service Provider OSP ID.	OB_TSF_OSP_ID	
Last Financial Class Code	The financial class indicates the source of revenue and funding that covers the costs of the service to a client / patient both.	LST_FIN_CLASS_CD	Domain values: Financial Class (EDW)
Last Billing Category Code	An indicator of the funding arrangements covering the service event.	LST_BILL_CATEGORY_CD	Domain values: Billing Category (EDW)
Age in Years at Start of Formal Admission	The number of full years elapsed between the date of live birth to the date of admission. Derived Data Element.	AGE_AT_ST_YRS	
Previous Specialised Treatment Code	Whether the patient has had a previous admission or service contact for treatment in the specialty area within which treatment is now being provided.	PREV_SPEC_TRT_CD	Domain values: Previous Specialised Treatment - AP
Service Event Request Source Type Code	The type of organisation or individual that requested a service from NSW Health.	SE_REQ_SRC_TYP_CD	Domain values: Request Source Type Code (Master List) (EDW)
First Legal Status Code	The legislative provision governing the patient's health care at the start of the service event.	FST_LGL_STAT_CD	Domain values: Legal Status Code (Master List) (EDW)
Australian Refined - Diagnosis Related Group Code	Australian Refined Diagnosis Related Groups is a patient service event classification system that provides a clinically meaningful way of relating the types of patients treated in a hospital to the resources required by the hospital. Versions 6, 6x, 7, 8, 9, 10 or 11 are available	AR_DRG_V{XX}_CD	
AR-DRG Major Diagnostic Category Code	Major diagnostic categories (MDCs) are higher level grouping of Australian Refined Diagnosis Related Group (AR-DRG) codes generally based on a single body system or aetiology that is associated with a particular medical speciality. Version 6, 6x, 7, 8, 9, 10 or 11 are available	MDC_v{xx}_CD	
Service-Related Group Version 4 Code	The classification of patients according to the type of speciality they principally receive during the episode of care, based on analysis of DRGs, and in some instances major diagnosis or major procedure.	SRG_V4_CD	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Enhanced Service-Related Group Service 4 Code	The classification of patients according to the type of speciality they principally receive during the episode of care, based on analysis of DRGs, and in some instances major diagnosis or major procedure. (enhanced Service-related Group version 4)	ESRG_V4_CD	
Day only flag	A flag allocated to each service event to indicate whether it was same day or overnight.	day_only_flag	
Service Event Mental Health Legal Status National Health Data Dictionary Code	Whether a person is treated on an involuntary basis under the relevant state or territory mental health legislation, at any time during an episode of admitted patient care, an episode of residential care or treatment of a patient/client by a community-based service during a reporting period, as represented by a code.	SE_MH_LGL_STAT_NHDD_CD	Domain values: Legal Status Code (Master List) (EDW)
Service Event - Admitted - Separation Mode National Health Data Dictionary Code	Code representing the status at separation of the reported patient / client (discharge / transfer / death) and place to which they are released, as required for Commonwealth reporting.	SE_SEP_MODE_NHDD_CD	Domain values: Service Event Separation Mode National Standard Code (Master List) (EDW)
Service Event - Formal Admission Urgency Code	An indication of whether or not, the admission was either an emergency, that is, care or treatment was required within 24 hours, or the admission was planned or a regular same day admission or is associated with a maternity/newborn admission.	FRML_ADM_URGENCY_CD	Domain values: Formal Admission Urgency Code (EDW)
Service Event - Admitted Mode National Health Data Dictionary Code	Code representing how a person begins an admitted patient service event / episode of care, as reported to the Admitted Patient Care National Minimum Data Set.	SE_ADM_MODE_NHDD_CD	Domain values: Service Event Admission Mode National Code (EDW)
Service Event - Service Category Code	The principal clinical intent or treatment goal of the care provided to the patient for the episode of care.	SE_SRV_CATEGORY_CD	Domain values: Service Event Service Category Code (EDW)
Service Event - Admitted - Formal Discharge Mode Code	Status at separation of person (discharge/ transfer/ death) and the place to which the person was released (where applicable) at the conclusion of an admitted patient encounter / stay in hospital.	FRML_DISCH_MODE_CD	Domain values: Discharge Mode Code
Formal Readmission Status Code	Formal Admit Intended Length of Stay Code.	FRML_READM_STAT_CD	Domain values: Formal Readmission Status Code (EDW)

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Service Event Insurance Claim Flag Code	An indicator of whether or not the patient intends to make a claim for the costs of this episode against their private health insurance cover.	SRV_ENC_INSUR_CLAIM_FG	Domain values: Service Encounter Insurance Claim Flag (EDW)
First Bed Type Code	The designation of the first bed used to accommodate a patient during a service event. Bed designations relate to a range of issues resource usage, funding arrangements, functional areas, and specialised use for particularly clinical conditions or procedures.	BED_TYP_CD	Domain values: Bed/Unit Type (Master List) (EDW)
First Collaborative Care Organisation Service Provider OSP ID	The unique value identifying the Organisation Service Provider that provided health care under a collaborative care arrangement.	FIRST_COLLABORATIVE_OSP_ID	
First Collaborative Care Organisation Service Provider OSP Type Code	The type of organisation service provider that provided health care under a collaborative care arrangement.	FST_CLB_OSP_TYP_CD	Domain values: Organisation Service Provider Type Code (EDW)
First Collaborative Organisation Service Provider OSP Type Group Code	A higher-level group code for the type of organisation service provider that provided health care under a collaborative care arrangement.	FST_CLB_OSP_TYP_GRP_CD	Domain values: Organisation Service Provider Type Group Code (EDW)
Service Event - Client Mode of Arrival Code	The mode of transport by which the person arrives at the location where a health service event is provided. Optional for Admitted Patient Service Events.	CL_MOA_CD	Domain values: Mode of Arrival (EDW)
Formal Admission Datetime	Service Event - Admitted - Formal Admission Datetime.	FRML_ADM_DTTM	
Formal Discharge Datetime	Service Event - Admitted - Formal Discharge Datetime.	FRML_DISCH_DTTM	
Service Event Total Hours	The total number of hours a patient spent in a designated unit during a service event.	CT_TOT_SE_HRS	
Service Event Total Days	The total number of days a patient spent in a designated unit during a service event.	CT_TOT_SE_DAYS	
Service Event Total Bed Hours	The total number of bed hours for a patient during a service event.	CT_TOT_SE_BED_HRS	
Service Event Total Bed Day Count	The total number of bed days for a patient during a service event.	CT_TOT_SE_BED_D_CT	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Service Event Total Leave Hours	The total number of leave hours for a patient during a service event.	CT_TOT_SE_LEAVE_HRS	
Service Event Total Leave Day Count	The total number of leave days for a patient during a service event.	CT_TOT_SE_LEAVE_D_CT	
Service Event Total Involuntary Mental Health Hours	The total number of involuntary mental health hours for a patient during a service event.	CT_TOT_SE_INVOL_MH_HRS	
Service Event Total Involuntary Mental Health Day Count	The total number of involuntary mental health days for a patient during a service event.	CT_TOT_SE_INVOL_MH_D_CT	
Service Event Total Psychiatric Bed Hours	The total number of psychiatric bed hours for a patient during a service event.	CT_TOT_SE_PSYC_BED_HRS	
Service Event Total Psychiatric Bed Day Count	The total number of psychiatric bed days for a patient during a service event.	CT_TOT_SE_PSYC_BED_D_CT	
Service Event Unqualified Newborn Indicator	An indicator of whether or not a baby born in hospital was unqualified under the Health Insurance Act for entire service event or not.	SE_UNQUAL_NWB_IND	
Service Event Total Unqualified Hours	The total number of newborn unqualified hours during a service event.	CT_TOT_SE_UNQUAL_HRS	
Service Event Total Unqualified Day Count	The total number of unqualified days for a newborn service event.	CT_TOT_SE_UNQUAL_D_CT	
Service Event Total Qualified Hours	The total number of newborn qualified hours for a service event.	CT_TOT_SE_QUAL_HRS	
Service Event Total Qualified Day Count	The total number of newborn qualified days during a service event.	CT_TOT_SE_QUAL_D_CT	
Service Event - Admitted - Intended Length of Stay (Days)	Service Event - Admitted - Intended Length of Stay (Days)	FRML_ADM_INTND_LOS_DAYS	
Service Event Total Critical Care Unit Hours	The total number of hours a patient spent in a designated critical care unit during a service event.	CT_TOT_SE_CCU_HRS	
Service Event Total High Dependency Unit Hours	The total number of hours a patient spent in a designated high dependency unit during a service event.	CT_TOT_SE_HDU_HRS	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Service Event - Admitted - Total Mechanical Ventilation Hours	The total number of hours the patient spent on mechanical ventilation during the admitted service event.	CT_TOT_SE_MECH_VENT_HRS	
Service Event Total NICU hours	The total number of hours a patient spent in a designated neonatal intensive care unit during a service event.	CT_TOT_SE_NICU_HRS	
Service Event Total Intensive Care Unit Hours	The total number of hours a patient spent in a designated intensive care unit during a service event.	CT_TOT_SE_ICU_HRS	
Service Event Total Intensive Care Unit 1 Hours	The total time, in hours, spent in a Level 1 Intensive Care Unit (ICU1) during an admitted patient service event. A Level 1 ICU is a designated intensive care unit where nursing care is provided by a nurse who is caring for only one patient. Some of these patients may have nursing care provided by an additional nurse.	CT_TOT_SE_ICU1_HRS	
Service Event Total Intensive Care Unit 2 Hours	The total time, in hours, spent in a Level 2 Intensive Care Unit (ICU2) during a service event. A Level 2 ICU is a designated intensive care unit where nursing care is provided by a nurse who is caring for two patients.	CT_TOT_SE_ICU2_HRS	
Service Event Total Close Observation Unit Hours	The total number of hours a patient spent in a designated close observation unit during a service event.	CT_TOT_SE_COU_HRS	
Service Event Emergency Department Visit Indicator Code	An indicator of whether or not the patient visited the Emergency Department at any time during an admitted patient service event.	SE_ED_VISIT_IND_CD	Domain values: Service Event Emergency Department Visit Indicator (EDW)
Service Event Psychiatric Bed Used Indicator Code	Flag indicating whether a psychiatric bed was used in the reported service event.	SE_PSYC_BED_USED_IND_CD	Domain values: Service Event Intensive Care Unit Bed Used Indicator (EDW)
Referral Target Type Code Set	The type[s] of organisation entity or individual that a client was referred to following an admitted patient or emergency department service.	REFL_TRGT_TYPE_CD_SET	
Client Date Of Birth - YYYY-MM-DD	The date of birth recorded for the client / patient.	CL_DOB	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Client Sex At Birth Code	The distinction between male, female, and others who do not have biological characteristics typically associated with either the male or female sex.	CL_SEX_CD	Domain values: Sex at Birth Code
Client Country Of Birth Code	The country of birth of the client / patient.	CL_CTRY_OF_BIRTH_CD	ABS SACC 2016
Reason for No Health Insurance Claim Code	Reason why a patient did not make a claim against a private health insurance company.	CL_NO_RECED_HLTH_INSUR_RSN_CD	Domain values: Reason for No Health Insurance Claim
Client Hospital Insurance Fund Type Code	Describes the type of health insurance cover the client has with a third-party insurer.	CL_HOSP_INSUR_POLICY_TYP_CD	Domain values: Health Insurance Type Code (EDW)
Client Veteran Healthcare Policy Type Code	The type of health cover for the client supplied by the Department of Veterans' Affairs (DVA) for an eligible veteran, veteran's spouse or dependent child.	CL_DVA_HLTHCARE_POLICY_TYP_CD	Domain values: Department of Veterans' Affairs card colour
Client Interpreter Required Code	Flag representing whether the client or patient requires the services of an interpreter.	CL_INTERPRETER_REQUIRED_CD	Domain values: Interpreter Required flag (EDW)
Client Indigenous Status Code	Code representing whether a person identifies as being of Aboriginal Origin or Torres Strait Islander Origin or both.	CL_INDIGENOUS_STAT_CD	Domain values: Indigenous Status Code (EDW)
Client Preferred Language Code	The language (including sign language) most preferred by the person for communication. This may be a language other than English even where the person can speak fluent English.	CL_PREFERRED_LANG_CD	ABS ASCL
Client Marital Status Code	Code representing the marital status of the Client.	CL_MARITAL_STAT_CD	Domain values: Marital Status
Cleansed Postcode	Postcode component of the address at which the client usually resides.	CLN_POSTCODE	
Client Address ASGS SA L2 2011 Code	The Level 2 Statistical Area code, as per the 2011 Australian Statistical Geographic Standard, in which the client's residence exists.	ASGS_SA_L2_11_CD	ASGS 2011
Client Address ASGS SA L2 2016 Code	The Level 2 Statistical Area code, as per the 2016 Australian Statistical Geographic Standard, in which the client's residence exists.	ASGS_SA_L2_16_CD	ASGS 2016
Client Address ASGS SA L3 2011 Code	The Level 3 Statistical Area code, as per the 2011 Australian Statistical Geographic Standard, in which the client's residence exists.	ASGS_SA_L3_11_CD	ASGS 2011

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Client Address ASGS SA L4 2011 Code	The Level 4 Statistical Area code, as per the 2011 Australian Statistical Geographic Standard, in which the client's residence exists.	ASGS_SA_L4_11_CD	ASGS 2011
Client Address Geocoded National Address File ASGS Local Government Area 2017 Code	The ASGS Local Government Area 2017 Code reported in the Geocoded National Address File (GNAF), in which the client's address exists.	GNAF_LGA_17_CD	ASGS LGA 2017
Cleansed State Territory Abbreviation	The defined State or Territory in Australia (in abbreviated format) that the specific place name / address is located.	CLN_STT_ABBR	
Client Address ASGS SA L2 2021 Code	The Level 2 Statistical Area code, as per the 2021 Australian Statistical Geographic Standard, in which the client's address exists.	CL_URES_ADDR_ASGS21_SA_L2_CD	ASGS 2021
Client Address ASGS SA L3 2021 Code	The Level 3 Statistical Area code, as per the 2021 Australian Statistical Geographic Standard, in which the client's address exists.	CL_URES_ADDR_ASGS21_SA_L3_CD	ASGS 2021
Client Address ASGS SA L4 2021 Code	The Level 4 Statistical Area code, as per the 2021 Australian Statistical Geographic Standard, in which the client's address exists.	CL_URES_ADDR_ASGS21_SA_L4_CD	ASGS 2021
Client Address ASGS 2021 State Code	The state code, as per the 2021 Australian Statistical Geographic Standard, in which the client's address exists.	CL_URES_ADDR_ASGS21_ST_TERR_CD	ASGS 2021
Address ASGS 2021 Statistical Area Level 1 Determined Remoteness Area Code	The ASGS 2021 Remoteness Area Code determined from the lookup of the ASGS 2021 Statistical Area Level 1 Code assigned to the relevant address at the time of the service event, by the geo-coding process.	CL_URES_ADDR_ASGS21_SA_L1_RA_CD	ASGS 2021
Address ASGS 2021 Statistical Area Level 2 Determined Remoteness Area Code	The ASGS 2021 Remoteness Area Code determined from the lookup of the ASGS 2021 Statistical Area Level 2 Code assigned to the relevant address at the time of the service event, by the geo-coding process.	CL_URES_ADDR_ASGS21_SA_L2_RA_CD	ASGS 2021
Client Usual Residential Address Postcode determined ASGS 2021 Remoteness Area Code	The ASGS 2021 Remoteness Area Code determined from the lookup of the Postcode of the patient's usual residential address.	CL_URES_ADDR_ASGS21_PC_RA_CD	ASGS 2021

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Client Address Health Jurisdiction Location Identifier	The unique identifier of the health jurisdiction / local health district (LHD) location for the client's address.	CL_URES_ADDR_LHD_HLTH_JURIS_ID	

Variable list: EDWARD Service event diagnosis details.

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Service Event Combined Business Key Surrogate Key (Masked)	Service Event Combined Business Key - Surrogate Key.	SE_CBK_SK	
Diagnosis Sequence Number	A sequential number assigned to each diagnosis recorded by the clinician for each service event.	DIAG_SEQ_NUM	
Diagnosis Code and NSW Health Identifier for Diagnosis Classification system and edition from source system	A diagnosis is the decision reached, after assessment, of the nature and identity of the disease or condition of a patient. It may be a disease, condition, injury, poisoning, sign, symptom, finding, complaint, or other factor influencing health status.	DIAG_CD_SRC	
Diagnosis classification system and edition (reference codeset)	The classification and edition used to report the diagnosis as a coded value.	DIAG_DOM_NM	
Diagnosis code where matched to reference codeset	A diagnosis is the decision reached, after assessment, of the nature and identity of the disease or condition of a patient. It may be a disease, condition, injury, poisoning, sign, symptom, finding, complaint, or other factor influencing health status.	DIAG_CD	
Condition Onset Type Code	An indication as to whether the reported condition arose during the reported admitted patient service event.	COND_ONSET_TYP_CD	Domain values: Condition Onset Type Code (EDW)

Variable list: EDWARD Service event intervention details.

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Service Event Combined Business Key Surrogate Key (Masked)	Service Event Combined Business Key - Surrogate Key.	SE_CBK_SK	
Service Event Intervention Sequence Number	The sequence number of the intervention service event.	SE_INTVN_SEQ_NUM	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Intervention Code and NSW Health Identifier for Intervention classification system from source system	Code representing the intervention clinical code (e.g. ACHI code) used to reflect the clinical condition(s) of the procedures performed on a patient during the episode of care.	INTVN_CD_SRC	
The Intervention classification system and edition (reference codeset)	The classification and edition used to report the intervention as a coded value.	INTVN_DOM_NM	
Intervention Code where matched to reference codeset	Code representing the intervention clinical code (e.g. ACHI code) used to reflect the clinical condition(s) of the procedures performed on a patient during the episode of care.	INTVN_CD	
AHCI Procedure Block Code	Code representing the ACHI Intervention Block code.	ACHI_PROC_BLOC_CD	
Service Event Intervention Provider Indicator Code	An indication of whether the service activity / intervention was performed by the hospital / health service responsible for reporting the activity or another hospital (e.g. as a collaborative care service), and whether it was performed on an admitted or non-admitted patient basis at the other site.	SE_INTVN_PROV_IND_CD	Domain values: Service Activity Provider Indicator (EDW)
Intervention Start Datetime	The date and time that the Admitted Patient Activity (Intervention) started.	INTVN_ST_DTTM	
Intervention End Datetime	The date and time that the Admitted Patient Activity (Intervention) ended.	INTVN_END_DTTM	

Admitted Patient (Public Sector) Data Legacy Format variable list

Variable list: Legacy Public Sector data - Episode information and client characteristics.

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Local Health District of Facility		area_identifier	Domain values: Area Identifier
Facility Identifier	The specific hospital, nursing home or day procedure centre reporting the inpatient episode of care.	facility_identifier_recode	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Facility Type	The category of the facility through which the health service is delivered.	facility_type	Domain values: Facility Type
Acute Hospital Flag	An indicator to denote whether the facility is classified as an acute hospital.	acute_flag	Domain values: Acute Facility Flag
Peer Group	Groupings of public health facilities that are considered similar for benchmarking purposes.	peer_group	
Recognised Public Hospital Flag	Flag to identify whether the patient attended a facility that was a public hospital recognised by the Commonwealth Government under the Medicare Agreement.	recognised_ph_flag	Domain values: Recognised Public Hospital Flag
Stay number (masked)	The code that uniquely identifies, in the source system, the admission (stay in hospital) within a facility. (masked)	stay_number_e	
Episode Sequence Number	The sequence number of an episode during a period of stay.	episode_sequence_number	
Episode of Care Type	The principal clinical intent or treatment goal of the care provided to the patient for the episode of care.	episode_of_care_type	Domain values: Service Category
Episode Start Date	The date on which an admitted patient commences an episode of care, by either a formal admission to the hospital or a type change to a subsequent episode within the one stay in hospital.	episode_start_date	
Episode Start Time	The time at which an admitted patient commences an episode of care, by either a formal admission to the hospital or a type change to a subsequent episode within the one stay in hospital.	episode_start_time	
Episode End Date	The date on which an admitted patient completes an episode of care, by either a formal discharge from the hospital or by a statistical type change to a subsequent episode	episode_end_date	
Episode End Time	The time at which an admitted patient completes an episode of care, by either a formal discharge from the hospital or by a statistical type change to a subsequent episode.	episode_end_time	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Facility transferred from	The hospital, nursing home or day procedure centre the patient was transferred from.	facility_trans_from_recode	
Facility transferred to	The hospital, nursing home or day procedure centre the patient was transferred to.	facility_trans_to_recode	
Emergency Department Status	A flag that indicates whether a patient during an episode of care has been treated within the emergency department, and if so, whether they were also admitted to a ward.	ed_status	Domain values: Emergency Department Status
Emergency Status (Urgency of Admission)	Urgency of admission. Indicates whether or not, in the opinion of the treating clinician, the admission was an emergency: that is, care or treatment was required within 24 hours.	emergency_status	Domain values: Urgency of Admission
Episode day stay length of stay	The total length of time for a Day Stay episode of care, calculated from the episode start and episode end dates.	episode_day_stay_los	
Episode leave days total	The total number of days the patient was not at the hospital between the date of admission and separation. Periods of leave may be up to 7 days, however there is no limit to the number of periods of leave a patient can take during an episode of care. A large number of leave days are common for psychiatric patients	episode_leave_days_total	
Episode length of stay	The number of days the patient spent in the hospital.	episode_length_of_stay	
Health Insurance on admission	Indicates whether the person receiving the inpatient service is insured with top cover or basic cover, or not insured at the time of admission. This variable is not intended to indicate whether or not the person utilises hospital benefit entitlements.	health_insurance_on_admit	Domain values: Health Insurance Status on Admission
Hours in ICU	The number of hours the patient spent in a designated intensive care unit for this episode of care.	hours_in_icu	
Hours on mechanical ventilation	The total number of completed hours that the patient has spent on mechanical ventilation during the episode of care.	hours_on_mech_ventilation	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Last psychiatric admission date	Where the person has had a previous admission to a designated psychiatric unit in any facility, the year that the person was last separated from the designated psychiatric unit.	last_psych_admission_date	
Days in Psychiatric Unit	If a patient has been admitted to a designated psychiatric unit at any time during the episode of care, enter the number of days the patient was accommodated in the designated psychiatric unit.	days_in_psych_unit	
Involuntary days in psychiatric unit	The sum of the number of days or part days of the episode of care that the person was an involuntary patient under the Mental Health Act, minus the sum of leave days occurring during the episode within the designated unit.	involuntary_days_in_psych	
Mode of separation	The method (discharge, death, transfer, etc) by which the patient separates from the episode of care. Values may (or may not) have leading zeroes.	mode_of_separation	Domain values: Mode of Separation (Admitted Patient)
DRG mode of separation	The method (discharge, death, transfer, etc) by which the patient separates from the episode of care (National Health Data Dictionary Definition)	drg_mode_of_separation	https://meteor.aihw.gov.au/content/722644
Unit type on admission	The designation of each bed, in terms of type of care or group of patients, which the patient is accommodated in during his/her stay in hospital.	unit_type_on_admission	Domain values: Bed/Unit Type (Current List)
Unqualified Newborn bed days	The number days a newborn was unqualified under the Health Insurance Act.	unqual_baby_bed_days	
Qualified Newborn bed days	The number days a newborn was qualified under the Health Insurance Act.	qualified_bed_days_recode	
Source of referral	The source from which the person was referred to the hospital. Values may not have leading zeroes.	source_of_referral	Domain values: Source Of Referral
Referred to on separation	The service to which the patient was referred on separation from this episode of care. Values may not have leading zeroes.	referred_to_on_separation	Domain values: Referred to on Separation
Collaborative / Contract Care Statue	An indication whether or not the admitted patient service being provided during this stay in hospital is being performed under a contractual agreement with another facility or health service.	contract_status	Domain values: Collaborative Care Status

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Financial Class	This information should be determined by the hospital based on the patient's Medicare eligibility, election to be treated by a hospital or hospital doctor, election of single or private room accommodation, compensable status, DVA status, same day/overnight status, etc.	financial_class	Domain values: Financial Class (HIE Masterset)
Financial Sub-program	The code used to represent the financial program recorded for an episode of care to indicate the type of service under which the episode was categorised.	financial_sub_program	Domain values: Mental Health Financial Sub-Program
Financial Program	A code to identify the various components of the mental health financial program to aid in the identification of service specific activities, and where the primary episode of care costs were incurred.	financial_program	Domain values: Financial Program (ISC)
Payment Status on Separation	Indicates the payment status of the patient.	payment_status_on_sep	Domain values: Payment Status on Separation
Department of Veterans Affairs card type	Indicates the type of Veterans Affairs card	dva_card_type	Domain values: Department of Veterans Affairs card colour
Birth date	Date of birth of the patient.	birth_date	
Age	The age (in years) of the patient (at episode start)	age_recode	
Age group	Five-year age group, derived from age.	age_grouping_recode	
Sex	The biological sex of the patient.	sex	Domain values: Sex
Marital Status	The marital status of a patient at the start of an episode of care.	marital_status	Domain values: Marital Status
Indigenous Status	Whether the person is Aboriginal or Torres Strait Islander, based on the person's own self-report.	indigenous_status	Domain values: Indigenous Status
Country of Birth (SACC)	The country of birth of the patient. Coding may not always be according to SACC 2016	country_of_birth_sacc	ABS SACC 2016
Country of Usual residence (SACC)	The country of usual residence of a patient. Coding may not always be according to SACC 2nd edition.	country_of_usual_residence	ABS SACC 2016
State of Usual Residence		state_of_usual_residence	Domain values: State Abbreviation

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Local Health District of Residence	The unique identifier of local health district (LHD) location for the patient's address	lhd_2011_code	
Primary Health Network of residence	Primary Health Network code, as per the 2017 Australian Statistical Geographic Standard, in which the patient's residence exists.	phn_2017_code	
ASGS 2011 SA2 of residence	The Level 2 Statistical Area code, as per the 2011 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa2_2011_code	ASGS 2011
ASGS 2011 SA3 of residence	The Level 3 Statistical Area code, as per the 2011 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa3_2011_code	ASGS 2011
ASGS 2011 SA4 of residence	The Level 4 Statistical Area code, as per the 2011 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa4_2011_code	ASGS 2011
ASGS 2016 SA2 of residence	The Level 2 Statistical Area code, as per the 2016 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa2_2016_code	ASGS 2016
ASGS 2016 SA3 of residence	The Level 3 Statistical Area code, as per the 2016 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa3_2016_code	ASGS 2016
ASGS 2016 SA4 of residence	The Level 4 Statistical Area code, as per the 2016 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa4_2016_code	ASGS 2016
LGA 2016 of residence	The ASGS 2016 Local Government Area Code in which the patient's residence exists.	lga_2016_code	ASGS 2016
ASGS 2021 SA2 of residence	The Level 2 Statistical Area code, as per the 2021 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa2_2021_code	ASGS 2021
ASGS 2021 SA3 of residence	The Level 3 Statistical Area code, as per the 2021 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa3_2021_code	ASGS 2021
ASGS 2021 SA4 of residence	The Level 4 Statistical Area code, as per the 2021 Australian Statistical Geographic Standard, in which the patient's residence exists.	sa4_2021_code	ASGS 2021

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
LGA 2021of residence	The ASGS 2021 Local Government Area Code in which the patient residence exists.	lga_2021_code	ASGS 2021
Service Related Group (SRG)	The classification of patients according to the type of speciality they principally receive during the episode of care, based on analysis of DRGs, and in some instances major diagnosis or major procedure.	srg	
SRG Version	The Version / Edition of SRG	srg_version	

Variable list: Legacy Public Sector data - Episode Diagnosis information.

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Clinical Codeset	The classification scheme used to code a procedure or diagnosis	clinical_codeset	Domain values: Clinical Codeset
Diagnosis codes	Diagnoses for the episode of care coded according to ICD-10-AM edition current at the end of the episode.	diagnosis_code	
Diagnosis type	The classification of diagnosis codes as principal or additional / other.	diagnosis_type	Domain values: Diagnosis Type
Condition onset flags	A qualifier for each coded diagnosis indicating the onset of the condition relative to the beginning of the episode of care. Available from 1 July 2008	condition_onset_flag	Domain values: Condition Onset Flag

Variable list: Legacy Public Sector data - Episode Procedure information

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Procedure code	The ACHI code specific to each procedure undertaken during an episode of care, defining what was performed during the associated episode/event.	procedure_code	
Procedure type	The classification of procedures as either principal / first listed or secondary.	procedure_type	
Procedure block number	A code which groups similar procedures of a particular body site and/or particular procedural intervention, to assist with the location of procedure codes and data aggregation.	block_num	

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Procedure location number	The location where the procedure was delivered.	procedure_location	Domain values: Procedure Location

Variable list: Legacy Public Sector data - Episode AR-DRG Information.

Full variable name	Description / notes	Variable name[s] in dataset	Codeset
Australian Refined Diagnosis Related Group (AR DRG) Code	Australian Refined Diagnosis Related Groups is a patient service event classification system that provides a clinically meaningful way of relating the types of patients treated in a hospital to the resources required by the hospital.	an_drg	
AR DRG Version	The version / Edition of AR-DRG	an_drg_version	
AR DRG - Major Diagnostic Category	Major diagnostic categories (MDCs) are higher level grouping of Australian Refined Diagnosis Related Group (AR-DRG) codes generally based on a single body system or aetiology that is associated with a particular medical speciality.	mdc
